

SONICWALL PRO

Internet Security Appliance

SonicWALL PRO Features and Benefits

- **State-of-the-Art Firewall Security.** SonicWALL Internet security appliances use stateful packet inspection to protect your LAN from hackers and vandals on the Internet.
- **Network Anti-Virus.** SonicWALL Network Anti-Virus, an option based on Network Associates' market-leading anti-virus product, ensures your business is protected against the latest virus outbreaks by automatically installing the client software, updating the clients as soon as new cures are available and ensuring protection is active.
- **IPSec Virtual Private Networking (VPN).** SonicWALL VPN, a standard feature on SonicWALL PRO, provides an easy, affordable, and secure means for remote workers to access the enterprise LAN. SonicWALL VPN is based on the IPSec standard, making it compatible with other IPSec VPN gateways, such as Check Point Firewall-1, Cisco PIX, Nortel Contivity and Axent Raptor.
- **SonicWALL Authentication Service.** With the optional SonicWALL Authentication Service, network administrators can add strong authentication to SonicWALL VPN using public key infrastructure (PKI) and digital certificates. This service delivers the benefits of PKI without the cost and complexity of other PKI solutions.
- **High Availability.** The SonicWALL High Availability Upgrade eliminates network downtime by allowing the configuration of two SonicWALLs (one primary and one backup) as a high availability pair. The backup SonicWALL monitors the primary SonicWALL and takes over operation in the event of a failure. This ensures a secure and reliable connection between the protected network and the Internet.
- **Internet Content Filtering.** SonicWALL's content filtering allows businesses to create and enforce Internet access policies tailored to the needs of the organization. An optional subscription to the CyberNOT List is available to extend the included content filtering capabilities.
- **AutoUpdate.** SonicWALL Internet security appliances maintain the highest level of security by automatically checking for new firmware updates with protection against newly discovered hacker attacks. All firmware updates are FREE for the life of the product.
- **ICSA Certified.** SonicWALL Internet security appliances have been certified by the International Computer Security Association (ICSA).
- **Powerful, Scalable Architecture.** SonicWALL Internet security appliances' robust architecture meets the high demands of today's Internet security environment and provides a scalable platform for future upgrades.

SonicWALL PRO Technical Specifications

CPU 233 MHz StrongARM RISC
RAM 8MB
Flash 4MB

Real Time Clock Lithium-Ion battery

Interfaces (3) RJ-45: 10/100Base-T Ethernet/Fast-Ethernet

Status LEDs Power
 Test
 Alarm

Ethernet LEDs Link
 Activity

Power Internal switching power supply
 84 VAC-264 VAC
 47 Hz - 440 Hz

Dimensions 19 x 8.875 x 1.75 inches
 (48.3 x 22.3 x 4.4 cm)
 mounting hardware for standard 19" rack included

Weight 6 lbs. (2.7 kg)

Approvals ICSA Certified
 FCC Rules, Part 15, Class A
 CE Mark
